Professional Summary

MERN Stack Developer with hands-on experience, most recently as a Software Engineering Intern at Systems Limited, contributing to enterprise web application development. Skilled in React.js, TypeScript, JavaScript, Node.js, Express.js, and MongoDB, with practical experience in REST API integration, JWT authentication, responsive UI development, and component-based architecture. Additionally experienced in building AI-powered applications using Python, machine learning, and generative AI technologies.

Education

Lahore College for Women University (LCWU) — Lahore, Pakistan
Bachelor of Science in Computer Science (BSCS) — *Aug 2025*

Professional Experience

Systems Limited — Lahore, Pakistan
MERN Stack Developer Intern — *Jan 2026 – Jun 2026*

- Contributed to the development and maintenance of modern web applications using the MERN technology stack.
- Developed responsive and reusable UI components using React.js, TypeScript, and Tailwind CSS.
- Implemented component-based architecture to improve application maintainability and scalability.
- Integrated frontend applications with RESTful APIs using Axios for client-server communication.
- Utilized Redux Toolkit for centralized state management and efficient data flow.
- Collaborated with senior developers to debug issues, implement new features, and improve application performance.
- Participated in Agile practices including sprint planning, task tracking, and code reviews.
- Used Git and GitHub for source code management and collaborative development.

Interns Pakistan
Web Development Intern — *Mar 2024 – Apr 2024*

- Developed responsive web pages using semantic HTML5, CSS3, and JavaScript.
- Implemented interactive user interfaces and customized WordPress websites.
- Gained foundational exposure to PHP-based web development and strengthened debugging and responsive design skills.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++, C

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, React Router, Redux Toolkit, React Hook Form, ShadCN UI

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Mongoose

AI / ML: TensorFlow, Keras, OpenCV, MediaPipe, Scikit-learn, Logistic Regression, Streamlit

Tools: Git, GitHub, Postman, VS Code, Android Studio, Vercel, Streamlit Cloud

Concepts: OOP, Data Structures & Algorithms, MVC, CRUD, Component-Based Development, SDLC, Responsive Design

Technical Projects

DevScope AI | *React.js, TypeScript, Node.js, Express.js, MongoDB, Gemini API* — In Progress

- Developing an AI-powered platform that analyzes software requirements and generates structured technical insights and development workflows.
- Implementing authentication, project dashboards, analysis history, requirement organization, and AI-generated insights.
- Using Redux Toolkit, Tailwind CSS, REST APIs, JWT authentication, and Gemini API integration.

AI-Based Arm Rehabilitation System | *Python, CNN, TensorFlow, Keras, OpenCV* — Final Year Project

- Designed and developed an AI-powered rehabilitation system combining Computer Vision, Deep Learning, and interactive therapeutic exercises.
- Implemented movement detection, movement analysis, personalized exercise recommendations, and real-time feedback.
- Authored a research manuscript based on the developed system; publication pending.

Titanic Survival Prediction | *Python, Scikit-learn, Logistic Regression, Streamlit* Completed

- Developed a web-based Machine Learning application that predicts passenger survival using Logistic Regression.
- Implemented data preprocessing and an interactive Streamlit interface for real-time predictions.

MERN E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS* Completed

- Developed a full-stack e-commerce application with product browsing, shopping cart, authentication, CRUD operations, and responsive UI.
- Developed backend APIs, MongoDB schemas, authentication workflow, and frontend-backend integration.

Themeable Dashboard | *React.js, TypeScript, Tailwind CSS, Redux Toolkit* Completed

- Developed a responsive dashboard with reusable React components, theme switching, state management, and routing.

Boston Health AI Project | *HTML5, Tailwind CSS* Completed

- Designed and developed a responsive healthcare landing page for an AI-powered health platform.
- Implemented mobile-first layouts, semantic HTML, modern UI sections, and responsive styling.

Research Experience

A Self-Adapted Virtual Serious Game-Based Arm Rehabilitation System for Spasticity Patients
Research Manuscript – Publication Pending

- Conducted literature review on AI-assisted rehabilitation and investigated Computer Vision and Machine Learning techniques for spasticity assessment.
- Explored personalized rehabilitation approaches through intelligent recommendation systems.
- Documented research methodology, system architecture, implementation process, and research findings.

Training & Certifications

JavaScript Full Stack Development Program | *EXD Software House / NAVTTC*
Deloitte Australia – Technology Job Simulation Jun 2025
Machine Learning Capstone | *IBM / Coursera*
Generative AI for Data Scientists Professional Certificate | *IBM / Coursera*
AWS Generative AI Professional Certificate | *AWS / Coursera*
Meta Front-End Developer Professional Certificate | *Meta / Coursera*
Tailwind CSS | *Scrimba / Coursera*
Frontend Development – HTML | *Great Learning*
Aspire Leaders Program | *Aspire Institute*

Conferences & Workshops

- **Horizons in STEM Higher Education Conference** – British Council Funded Project on STEM Education in Pakistan.
- **International Workshop: Women Employability in Pakistan – Challenges and Opportunities.**

Achievements

- Authored a research manuscript on an AI-powered rehabilitation system; publication pending.
- Selected for and successfully completed professional software engineering internships and industry-focused training programs.
- Completed professional certification programs from internationally recognized organizations including Meta, IBM, and AWS.
- Built and documented applied projects spanning Full-Stack Development, Artificial Intelligence, Machine Learning, and Computer Vision.
